

RECLAIM

Funding Call on Urban Greenspace and People

Deadline 11th November 2022

Call for gap-filling research in the area of green-blue-grey infrastructure and people

A lack of hard evidence demonstrating the multi-functional aspects of nature-based solutions is a major challenge to widespread implementation of green-blue-grey infrastructure (GBGI).

RECLAIM network is issuing a funding call for small research projects up to £40k that explicitly address gaps in our knowledge of GBGI effectiveness against multiple outcomes, including social justice and equity.
